- ★ Quality Service and Facilities
- ★ Location

All our suites are accessed through corridors secured by electronic card entry, in addition to the private key entry for each suite. The common areas of the floor are also monitored 24/7 by surveillance cameras.

Each suite includes an individual thermostat, unlimited high-speed internet, a phone, phone line, and fax line with a total of 360 minutes per month of long distance, plus voicemail.

Each mail/copier room includes private mail boxes for each suite, plus a color laser copier/printer/scanner, and secure document shredding. You can print directly from your computer to the color laser printer, and use the scanner to convert your documents directly to PDF format for archiving or emailing.

Your guests are greeted at Reception by our professional staff, who also answer calls in your company's name, receive/send mail and packages for you, provide free notary services, and can fill in as temps when you need an extra hand.

Our conference rooms are equipped with high-speed internet (wired and wireless) and speaker phones, and supplied with bottled water and coffee.

Each kitchen is replenished with free snacks, coffee, and other drinks throughout the day.

Our facility is well situated in the area's banking, dining and shopping corridor, close to two major I-215 interchanges (Eastern and Pecos), with ample parking for you and your guests. Plenty of covered parking spaces are available.
